**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Goode, Jr. Goode, Jr. shows a manually operable tool for applying wet tape to drywall and wiping it as it is applied (column 3, lines 22-58) using a flexible scraper, 38, for wiping flat surfaces (column 3, lines 59-63). Goode, Jr. further teaches that the blade can be removed and replaced with a second blade for pressing tape into exterior and interior corners (column 4, lines 44-49).

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim is rejected under 35 U.S.C. 103(a) as being unpatentable over Goode, Jr. in view of Altmix. As shown in paragraph 2 above, Goode, Jr. shows the claimed tool except for the particular second interchangeable device for wiping the tape.

Altmix shows an apparatus for applying wet tape to drywall and using two interchangeable devices for wiping the tape: a flat roller for flat surfaces and an angled wheel on a lever for wiping inside corners (column 2, line 67 to column 3, line 9). It would have been obvious to one of ordinary skill in the art at the time the invention was made to add the angled wheel of Altmix to the apparatus of Goode, Jr. because Altmix teaches that a pivotable angled wheel allows for one device to accomplish two jobs automatically.

### ***Claim Objections***

5. Claim 3 is objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim must refer back to other claims in the alternative only. See MPEP § 608.01(n). Accordingly, the claim 3 not been further treated on the merits.

### ***Claim Rejections - 35 USC § 112***

6. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

7. Claims 1-3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claim 1, the parenthetical phrase, "(with compound)" is unclear as to whether the compound is a claim limitation. Regarding claim 2, the phrase "or the like" renders the claim(s) indefinite because the claim(s)

include(s) elements not actually disclosed (those encompassed by "or the like"), thereby rendering the scope of the claim(s) unascertainable. See MPEP § 2173.05(d).

### ***Conclusion***

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Norfolk, Rasanen, Harrell, Sweeny, and Edwards et al. each show drywall tape apparatuses.
